TOWARD HEALTHY HUMANITY

Celebrating the 153rd Birth Anniversary
of Dr. Maria Montessori

"Education is not as simple as it seems if we want the child to be a holistic and kind human being and a productive citizen of society. Nurturing childhood through right education, from school to family to create a natural, optimal and healthy environment for a child's development is a great contribution of adults for children, for society and the world."

Maitri Vietnam 2023

TOWARD HEALTHY HUMANITY

Celebrating the 153rd Birth Anniversary of Dr. Maria Montessori

Maitri in Sanskrit means compassion, unconditional love, (in English means loving-kindness). Maitri Vietnam 2023 would like to send a message of love and compassion from each of us to ourselves, to children and to humanity.

“There is understanding, there is love”. A true love is based on deep understanding. Join us, through the Montessori Maitri Vietnam 2023 online session series, to review and reflect on the "journey of childhood, the journey of development" of a person from childhood to adulthood under the scientific and humanistic perspective of Montessori.

Review and reflect so we can better understand ourselves, better understand our children, and most importantly understand the meaning and impact of education on individuals and on the world. To understand why the development of material life or technology does not make people happier, does not make the world better. Understanding makes us see for ourselves the opportunity and responsibility to contribute to the better.
